

WOOD

DISTRESSER

The Timesavers Distresser is designed to distress wood with one wire brush followed by one nylon brush for finish sanding to create the look of aged wood or a rustic antiquing aesthetic finish

The Timesavers Distresser is engineered for small to large-scale wood production taking lumber and distressing it to produce a custom finish

The Distresser is a top-of-the-line machine that can distress material such as; flooring, furniture parts, signage, cabinets, millwork, solid wood panels, veneer panels, old barn wood, and many other types of material. It can run cabinet doors, face frames, moulding, trim, solid wood, veneer panels, flooring, and more.

Machine Features:
